Full Stack Developer   Live Link
- Users can signup/login to comment and engage with the community regarding stock market events/topics
- Tech stack includes: React.js, Next.js, GraphQL, GraphCMS, deployed on Vercel

WORK EXPERIENCE

Fiverr   **Remote**
Software Engineer   2023 – Present
- Designed, implemented, and deployed scalable applications, websites, games, and programs using the latest technologies including React, Next.js, Node.js, MongoDB, etc. leading to a 100% customer satisfaction.
- Continuous integration of pull requests, code reviews, and unit testing.

ProEngineering Consulting   **Remote**
ME Project Manager Lead   2018 – 2022
- Led a team of 12+ mechanical and electrical engineers to design and develop 200+ enterprise-level MEP services for commercial and residential developments, projecting $800,000+ of revenue annually.
- Continuous Integration/Deployment of MEP designs; averaging 360+ submittals, RFIs, draft revisions, design reviews, & city plan check corrections quarterly.
- Oversaw daily stand-up meets to coordinate, design and implement scalable workflows & time management systems for a team of mechanical and electrical engineers, increasing work efficiency by 25% daily.
- Consulted 75+ high-value clients and led both onsite and online project kickoff meetings to foster relationships through a deep knowledge of the MEP product and client needs.

Thermo Fisher   **Vista, CA**
AdWords Specialist   2018 - 2018
- Collaborated with the marketing team, using Google analytics, Google AdWords, SEO, PPC advertising to drive traffic to multiple landing pages, increasing PPCs by 35%.
- Utilized my background in kinesiology to implement online marketing strategies to optimize curated words or phrases, using Google's key word and auction based, PPC platform, improving online campaigns performances based on data and reports analysis.

Corporate Technologies   **San Diego, CA**
IT Project Coordinator   2016 - 2017
- Collaborated with senior management on multiple functions including customer success and finance, increasing survey submissions from 60% previous month to 75% by identifying the pain points of customer feedback.
- Streamlined post-sales support to increase customer retention rate among enterprise clients by 27%
- Evaluated 100+ employees in 6 departments through surveys and office hours assessing strengths and overall skills which improved productivity tasks by 23%.
